

FINISHING TOUCHES

BANDING

Banding is paint that is applied over the top of the base finish. The location of banding traditionally is on the edges of tops, rails, raised panels and drawer fronts as an accent of color. Painted banding is a standard option on all of our pieces. If you would prefer one of our standard stains as banding please check with your showroom representative for available color combinations. Standard stain banding is considered a combination finish and does carry a 10% up charge.

SHADOW BANDING

Shadow banding is a band of paint or gilding that runs parallel and inside the edges. Shadow banding is a standard option on some pieces but it can be applied on most tops or drawer fronts for an up charge.

FAUX MARBLE DETAILING

Faux marble surfaces and details are offered for banding, table tops, panels, doors and drawer fronts. Please request a quote.

LEVEL OF DISTRESS

Upon ordering, clients can now select from one of three levels of distressing: light, standard or heavy. The following components make up distressing: spoke shaving, worm holing and gouging. All levels will incorporate the above elements and will only vary by degree. If a client prefers not to have gouging and/or worm holing this must be specified at time of order.

Each piece is individually hand-crafted by a skilled artisan. No two pieces are identical and therefore distressing will vary from piece to piece.

BIRTH RECORD & HAND SIGNED UNITS

Only after being carefully inspected by both our lead master craftsman and head artisan will a piece be hand tagged and hand signed. All authentic Farmhouse Collection pieces can be identified by their individually numbered brass plaque and their hand signed and dated birth record. Clients can now choose either a personalized or standard message. If a personalized message is specified, please limit it to no more than 35 characters, spaces included.
